Art Out: David Golde – “Electricities”

ART OUT, ART

David Golde's portfolio of images known as *Electricities* is currently on display at Yossi Milo Gallery. Golde is a photographer known for photographing phenomena and is back with electrified graphite sketches, not literally, the drawings were exposed to high-voltage electricity. Also from David's book, *Electricities*, "Snake in the Garden" a series of photographs can be seen in the viewing room. The series received the name because the images contain brilliant pastel colored flooring that are laced with drawn lines that at the time are carrying electricity. Giving the images a sense of danger. David Golde's photographs are in the permanent collections of many well known museums and galleries.

December 14 - January 27 245 Tenth Avenue (between 24th & 25th St.) New York, NY 10001
